

Drain and Overflow Kit

Brand new tub with old drain finishes? Overtime tubs can rust, crack, and look worn down which is why individuals get them refinished. The tubs drain and overflow pieces also get rusted and leak. This Drain and Overflow kit will not only look better than your old drain but also reduce the water leaking. The gasket re-directs water which helps eliminate possible leakage that would normally create rust and rot.

The installation of this drain and overflow kit is much less expensive than having a plumber install a new drain. A plumber would have to disrupt the existing pipes which would cause pipes breaking or other unexpected problems. Most plumbers charge over \$100.00 an hour to change your drain.

**This Chrome Drain and Overflow is only \$75.00 including installation.
Easy, no hassle, no problems, no mess kit!!!**

Also available in brushed nickel and oil rubbed bronze for \$110.00

Pricing includes installation.
