Thank you for your business and we know you'll love the new look of your freshly refinished fixture. Our product will provide you many years of continuous service but proper care should be taken. Just like any remodeling process, you need to take care of it in order for the condition to maintain. Proper cleaning of the bathtub/tile will ensure the finish stays looking great.

Use only non-abrasive cleaners and non-abrasive scrubbing pads. Do not use bleach or products containing bleach. Stay away from powders or soft scrub gels, as they can deteriorate and dull the surface (e.g. comet, Ajax, Soft Scrub, Magic Erasers). Products that are oil or wax-based, such as Pinesol, can leave a waxy residue or dull your finish as well. Other products to avoid include, but are not limited to: Mr. Clean Magic Erasers, hard bristle brushes, & steel wool. **Liquid cleaners and soft cloths or sponges are best. We suggest these products: Blue Scotch-Brite (non-scratch) pads; Zep- Shower, Tub, and Tile Cleaner; 409; Lysol Tub & Tile cleaner; Scrubbing Bubbles; or a DIY mixture of vinegar & water. PLEASE THOROUGHLY RINSE THE TUB WITH WATER AFTER USING A CLEANER.** Using a detachable showerhead to rinse down shower after each use is an easy way to keep the tub clean in-between cleanings.

**For hard water stains** Wash tub with approved cleaner. Dry tub, then use CLR (in yellow bottle, NOT the kind in the gray bottle) on rust stains and let sit for 10 minutes. Rinse and wash tub again with approved cleaner.

**We recommend the use of a shower caddy or basket to eliminate shower items sitting on the bathtub ledges.** Items sitting on the ledges can cause standing water which could possibly discolor the finish over time. Should you have any questions regarding cleaners please feel free to contact us.

Remember, bathmats and appliquéés **CANNOT** be used on the bathtub once it has been refinished.

Fixture can be used **24** hours after refinishing but must wait **30** days before cleaning.

No bath-bombs and or dyes, Including hair dyes.

No solvents shall ever be used on a refinished fixture. For example, Lacquer thinner, acetone or isopropyl alcohol.
