

🌀 Why a Nu-Life Inlay?

- Typically 90% of the wear & tear on a tub or shower occurs in only 10% of the tub. **The bottom!**
- The average replacement cost of a new tub or shower unit is \$750 - \$1500 with inevitable "additional charges"
- Replacement of your tub or shower unit requires the down time of your bathroom for 2 - 4 weeks on average. With all the dust, disruption and headaches that go with that.
- **Now** tub and shower bottoms can be permanently restored with our **Nu-Life Inlay System**. Our system provides strength and wear that is superior to the original, at only a fraction of the cost of replacement.

*Save time and money with
Nu-Life Inlay*

🌀 What is a Nu-Life Inlay?

The Nu-Life Inlay System is designed and manufactured by *Nu-Bath Inc.*™ for the **permanent** replacement of worn or damaged bathtub or shower bottoms

Original tub shower bottom worn, stained and cracked

Nu-Life Inlay installed (in one hour) with minimal down time. Bathtub unit permanently restored to a beautiful, durable, non-slip surface

🌀 How does it work?

A *Nu-Life Inlay* is a revolutionary new material that will never crack, wear out or delaminate from applied surface.

A *Nu-Life Inlay* will strengthen the original tub or shower surface to withstand even the toughest condition!

🌀 Fusion

Fusion is a process unique to our Nu-Life Inlay adhesion. Other adhesives and glues are limited in their ability to hold under stress and constant pressure. Plus very few are resistant to water! A *Nu-Life Inlay* is permanently bonded to the original surface by a chemical process that actually melts the two substrates together which enables the two materials to become one.

🌀 Stand-sure

Soaps, lotions, and creams in the tub and shower create a risk of injury from slip and fall. Stand-sure is a term used to identify the non-slip surface on tub and shower bottoms. Nu-Life Inlay provides a 100% built in stand-sure to reduce the risk of injury in the tub or shower.
